Tangram module IP to 8x FM

Description

Tangram module IP to 8x FM

GT 22 C

Long text

The GT 22 C module is part of the Tangram product portfolio. The GT 22 C module allows you up to 8 services in FM format to your network. Tangram is a very high density and highly flexible solution for all kinds of networks. The WISI Tangram chassis uses a fully redundant concept (n+1, 1+1).

High quality IP to analogue FM modulation

Up to 8 FM channels on 1 RF output

Advanced MPEG decoding

Outstanding signal parameters by direct digital modulation

High density 48 FM channels in 1 RU

RTP/ IP input streaming with FEC error correction

RDS extraction and insertion

For measurement / monitoring test ports of the output signal
